

Tour Comments

Was there anything you wanted to see or hear that you didn't?

- Was overwhelming (in a good way), way more than anticipated.
- No. Very thorough and informative.
- No. Very well organized. This was eye opening to say the least.
- Would like to see more of the Tech Ed areas.
- Why don't you show the Ag room to the community and talk about the struggles of that room?
- I had taken a mini tour last year with the Booster Club, so I already knew how bad some parts of the school are. I was curious to see the rest of the school.
- The tour was very thorough.
- Will the high school be air conditioned during the renovation process?
- No, the presentation in my opinion was excellent. I would like to know the feedback pro & con that you received.
- No, very informative.

Please share any thoughts on what you saw or heard.

- This was significantly more valuable than expected. Thank you for putting all of this together. Fabulous opportunity.
- Lots of good information. Many areas were worse than I knew.
- I understand that there is a real need to fix the high school – sooner than later.
- The school is an eye sore compared to surrounding. I travel nationally to schools, BD is horrible in logistics, finishes, safety and current technical needs. An update or new school is over due by years.
- I did not realize how badly the condition of the school was until the meeting. I hope spreading the word & these meetings will rapidly bring a change to this!!
- Easy to become “used” to the condition of the facility when I’m here so frequently. Good to focus on the program areas and really understand how poor the quality is overall.
- It was eye opening. We need to get this done. Strong finish – a server rack under a roof hatch in a bathroom – unbelievable.
- Excellent presentation tour. Nice to have Nick there to answer questions as well. I hope lots more people see this.
- The basement stinks! Also the tech ed area doesn't seem to have fresh air. The tech ed is “dinosaur age.”
- Excellent presentation.

- I feel that everyone who will fill out a survey should see what we have seen. I know that the building needed work & updating but I had no idea how much is really needed for our students. It's embarrassing to see some of the areas and to host other schools in some of the areas. I will encourage friends & relatives to take the tour.
- Some parts of the school are in obvious need of upgrades. The science rooms look great! We have great students and staff at BDHS, so it would be nice to say the same about the facility.
- The tour was an eye opener!! Lots of "repair" is needed! Hope more come to see the need!!
- It was interesting to see some areas of the school I hadn't seen before.
- I was shocked to see some of the areas of the high school that need renovations – i.e.: technology areas how outdated and not safe; the deplorable condition of the boy's locker room by the pit.
- Tour was extremely enlightening. I saw everything I wanted to see. The building is clearly outdated and doesn't serve the modern educational needs of our kids. You've done a remarkable job keeping the technology as updated as you have, but we simply need better, more contemporary infrastructure. The tech area and locker rooms are embarrassing. You're leading us in the right direction. I would also be opposed to starting from scratch, let's redo the current structure the way you suggest.
- It's horrible!
- I was amazed at the level of deterioration and upgrades that I saw. Young people need to be prepared for a work environment that does not require a college education. Certainly coordination with the technical school is necessary.
- Amazing how well the school functions with all the "problems". We need to give our kids the ability to function well beyond high school and be competitive. Better layout and what is proposed will accomplish this.
- I feel the need is very real – what a better way to invest in the future.

Please share any questions you have.

- We'll share what we saw and heard but keep sharing with the community as well.
- Have you considered a highlight video for Twitter, Facebook, etc... Lots of support and traction w/in community can be gained that way.
- How can I serve on a referendum team; or earlier to educate the community?
- What are the plans with the greenhouse? What if damage occurs during the reconstruction?
- On the website – red flag – please add the location of where tours are starting/where to meet.
- Why haven't the schools been shut down by the board of health?
