

\$10 Million of Facility Work Completed Since 2011

Watch your mail in late April for the community survey about safety and security needs at the High School and across the school district.

District and High School Facility Concerns

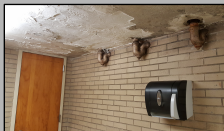

District Safety/Security

All schools need modified or relocated entrances.

Current designs do not reflect 2016 safety and security needs.

High School Locker Rooms & Outdoor Restrooms

Locker rooms for female students are smaller

than facilities for male students. The high school does not have outdoor bathroom facilities.

High School Infrastructure

Mechanical systems are approaching 40-years old.

Old boilers need to be re-moved. Heating, cooling, electrical and plumbing needs total \$7.7 million.

High School Facility Concerns

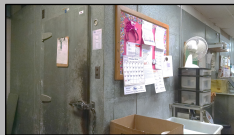

Career & Technical Education

The career and technical education wing is approaching

40-years old and does not allow for real life work experiences in a school setting.

Cafeteria & Kitchen

The current cafeteria & kitchen areas were designed

to accommodate 800 people, they now serve 1,100. Supervision of students is difficult, current lay-out limits community use.

General Classrooms

Many classrooms have remained untouched since 1958. They have asbestos floors & ceilings, poor lighting, damaging acoustics, falling ceilings, poor ventilation and inadequate electrical capacity.
